

## **Lesson 4 Quiz and Answers**

See how many you remember, and let us know how you did on social media

@ksbscotland

1. Can you name three things that make our ocean a superhero of the planet?

The ocean powers our climate – it helps to absorb greenhouse gases and mitigate climate change

The ocean makes clouds that make rain and snow to give us fresh water.

The ocean makes oxygen - every second breath you take comes from the ocean

2. Can you give some examples of the impact of climate change on our oceans and water?

Warmer oceans, changes to the water cycle, extreme water events like droughts or floods, ocean acidification and rising sea levels.

3. How can you help look after our local water?

Ask grown ups to only boil the water you need

Ask grown ups to make sure the washing machine is full before use.

Take shorter showers

Use a watering can instead of a hose

Make sure to turn off the tap – dripping taps waste water.
