Some of the bits of the tank make sure it doesn't leak.

the water is used.

Water  
Hippo

So we  
don't flush  
as much  
water

flush  
once

reusable  
water →

The toilet  
would only  
uses 1 L  
every FLUSH

The toilet  
would be  
made out of  
wood that's  
been varnished

The water  
will go through  
a pipe then go  
through a  
filter that separates  
the clean and  
dirty water  
the clean water  
will go into rivers  
this only takes  
up to ten minutes

Water hippo  
make your  
own

The water  
will be rain  
water instead  
of drinking  
water

Water hippo  
So we flush  
less.

Small  
handle with  
two buttons so  
we can flush  
a little.

Re-useable  
water.

Rain water.  
For a water  
but
