

What does sustainability mean?

Sustainability
means to live in a
way that looks after
our planet

At the moment we have and
buy lots of things

Making things can
harm our planet

Big holes are
dug to make
things from rock
and metal

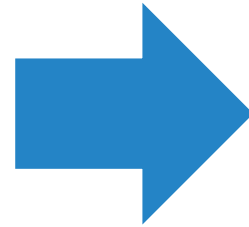

Trees are cut down to
make things from
wood

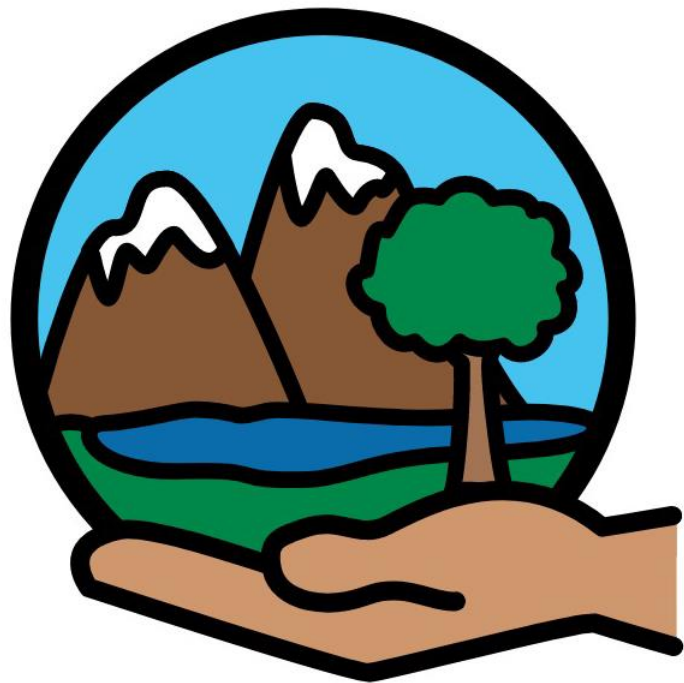

People are paid
too little
to make our things

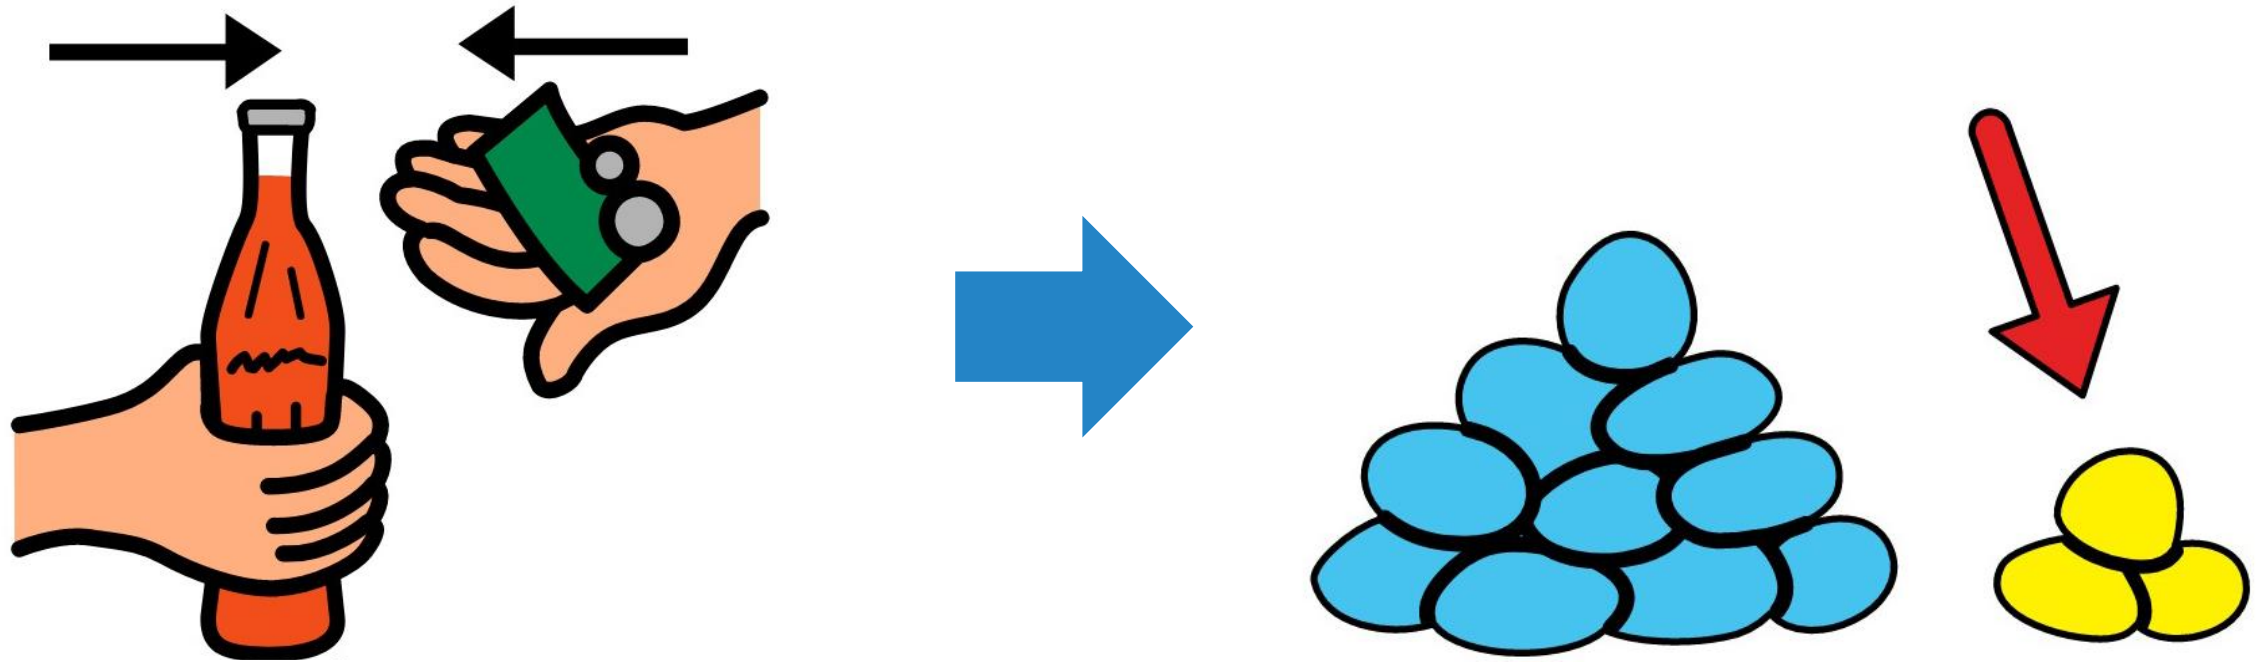

Lots of our things end up in the bin so there is lots of waste

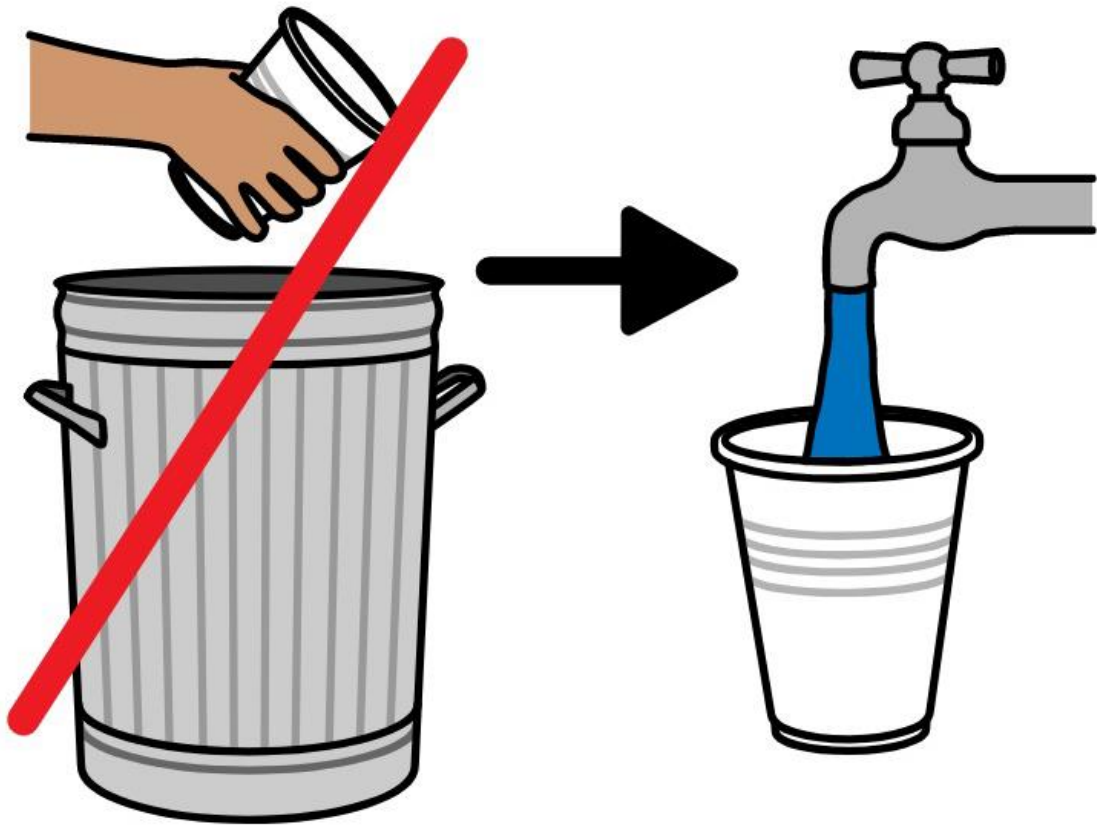

We can help our
planet by being
sustainable

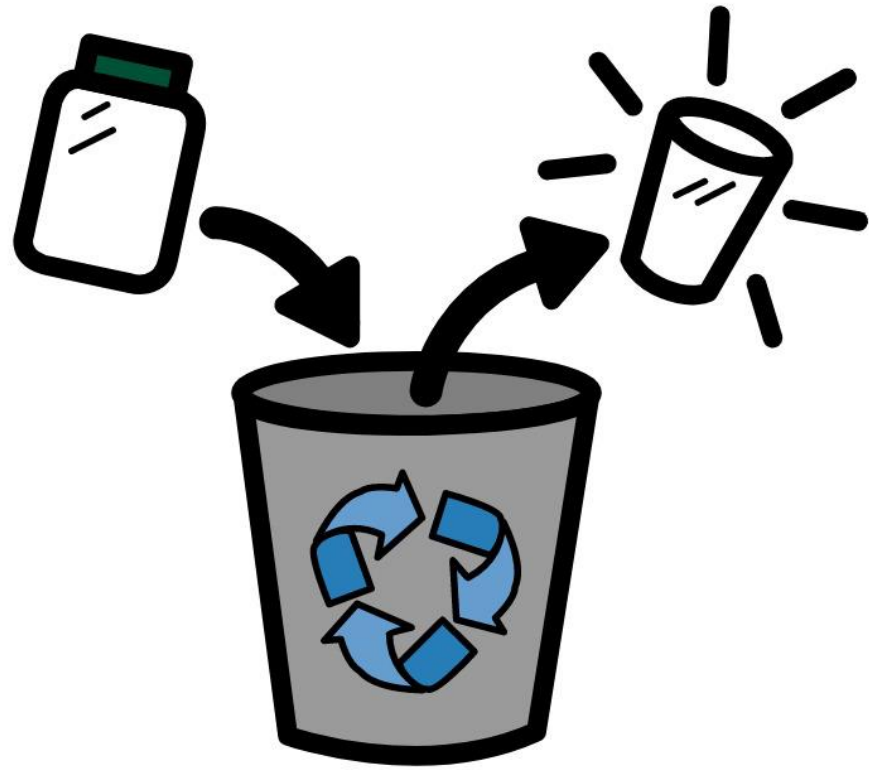

We can buy fewer things

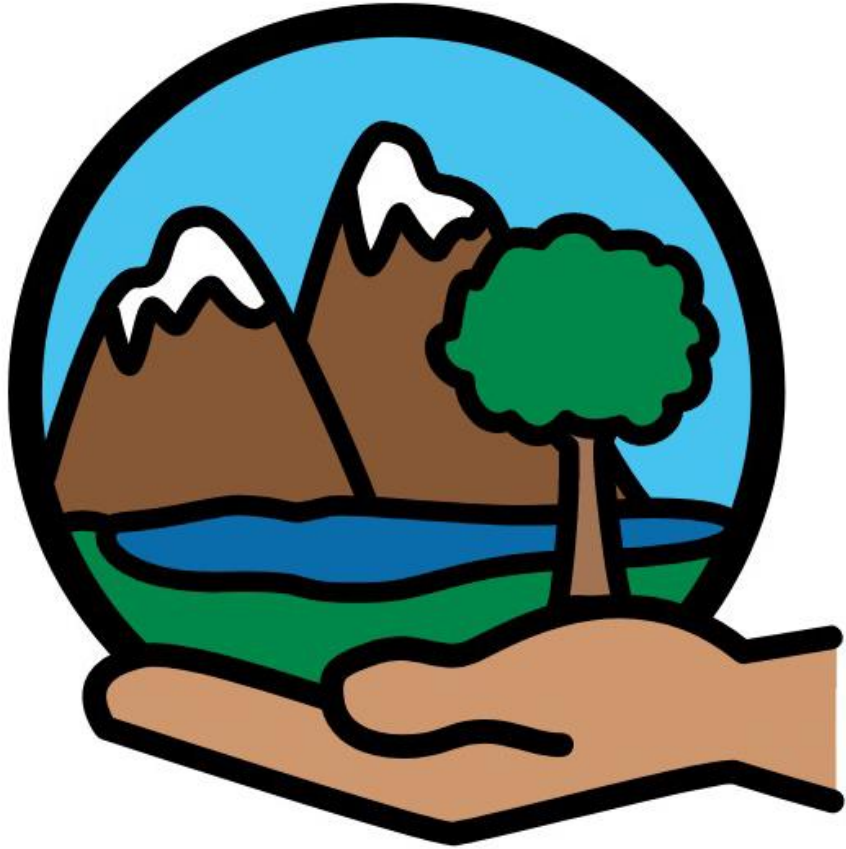

We can repair things
if they break

We can reuse things,
not throw them
away

We can recycle things

That is what
sustainable
means
