

Eco-Schools Scotland

Secondary Schools Curricular Audit

A Curricular Audit is required for all secondary schools as part of their Green Flag journey. This provides schools with an opportunity to investigate links between curricular learning and sustainable development themes and to celebrate the Learning for Sustainability themes already being delivered in day-to-day classroom work and other whole-school and extra-curricular activities.

The Audit

Schools can choose either of the templates provided on our website or can devise their own template for demonstrating curricular links. This template uses a departmental format. Lessons and activities included on the audit may cover topics or themes such as:

- sustainable consumption and production.
- climate change and energy.
- natural resource protection and management.
- environmental enhancement.
- initiatives designed to support understanding of and action towards sustainable communities in Scotland and across the world (e.g. global citizenship, physical/mental well-being, social cohesion etc.).
- use of the outdoor environment as a learning resource.
- Additional activities or initiatives which involve pupils in some form of sustainable action e.g. John Muir Award, Fairtrade Schools Award, Skills for Work, Duke of Edinburgh Award, Prince's Trust etc.

Further details on the Eco-Schools Green Flag Award in Scotland can be found on our website at
