

# 1st Year Eco Project

Water, water, can't we keep it clean?  
We're messing up the oceans, you know what I mean?  
When I was young, the water was so blue,  
But now I wonder, whatever can we do?  
You know what would be fantastic?  
Stop dumping all our plastic  
Into the ocean, you know what I mean?  
Come with me and keep the world clean. *(Andrew, Ijaz, Maxwell, Harry, Findlay)*

Hey, yo, you think you're cool  
Wasting all that water - what a fool.  
What about those children without a drink?  
All you need to do is have a little think.  
There's children walking miles, just to survive,  
While we're wasting water and they're all deprived.  
Without water, the world would just end.  
Come on now, let's not set a bad trend. *(Mhairi, Anna, Skye, Annabelle, Zoe)*

There are many easy ways to save the world,  
Stop wasting water and walk to work.  
We need to save the human race  
Coz global warming is taking place.  
Look to the ocean - what do you see?  
There's too much pollution, which destroys the reefs.  
Life goes by far too fast,  
So do this now and make the whole world last. *(Shreya, Annabel D, Isabelle, Annabel G, Qing Qing)*

You have invented a new kind of stupid,  
A killing all the animals in the zoo, kind of stupid.  
A melting all the ice and igloos, kind of stupid.  
Clearly, you haven't thought this through, kind of stupid.  
Don't you worry...don't you fret...  
We can fix this...it's not over yet.  
You can walk, use public transport,  
Just use your brains, it's nothing we can't sort. *(Jenna, Meixin, Jessica, Holly, Jennifer)*

Look at the world, what do we see?  
Chemical waste threatening biodiversity.  
Children in Africa need water aid.  
We're all volunteers - we're not getting paid.  
We shouldn't need to do this, it's not fair.  
How can we get the world to wake up and care?  
Hey, listen up, all I can say,  
Is you need to get your act up and help us today! *(Zara, Iona, Finlay, Shaun)*

Pick up your litter and put it in the bin.  
Remember to recycle your cans and tins.  
Pollution is going into the sea.  
The world is dying, and so are we.  
We must help the planet fight,  
Otherwise things will never be right.  
We'll conquer the litter with all our might,  
So we can live a better life. *(Sebastian, Kevin, Jude, Matthew)*

We need to take care of planet earth,  
To show everybody what it's worth.  
Shout it out loud to the crowd,  
Pollution is not allowed!  
There are also animals  
That are very valuable.  
So respect them and the world we share,  
Spread love and positivity everywhere! *(Olivia, Aimee, Franscesca)*

Is there a big enough plaster  
To cover this disaster?  
To destroy this world in its prime  
Would just simply be a crime.  
Polluting the seas, spilling oil,  
Will soon take its eternal toil,  
Soon there'll be elimination,  
Wiping out the population. *(Jonny, John, Aidan)*

Saving water is the right thing to do,  
Don't be selfish, it could be you.  
Brushing your teeth with the tap turned on,  
It's not right, it is wrong.  
Have a shower instead of a bath,  
It saves water, it's the right path.  
The meaning of water is the meaning of life.  
Please just listen, and be nice. *(Tanvi, Libby, Eilidh)*

Chemical leaks and water waste,  
Don't drink that, it's a horrible taste.  
Put your rubbish in the bin,  
If you don't, then it's a sin.  
Reduce, reuse, recycle,  
Don't drive your car, you can cycle.  
Ever hear a thing called global warming?  
Well, after this song, you'll get a good warning! *(Louis, Thomas, Dan)*

Stop all the spillages and toxic leaks,  
Earth right now isn't at its peak.  
Spilling oil in the sea makes us queasy.  
Saving our planet - it's really easy.  
Stop driving your car all around,  
Cut the emissions, we'll be safe and sound.  
Slow the warming, it's not right.  
If we work, we can get this done overnight. *(Sholto, James)*
