

Recipe for a disaster !

Ingredients:

A single use carrier bag blowing in the wind
A fizzy drinks can
Bubble wrap abandoned on a wall
Cigarettes squished onto pavements
A smashed coca cola bottle leaving shards of glass everywhere
Crisp packets on a beach after a picnic
Old soggy newspapers lying in the precinct
Polystyrene containers with vinegar outside a fish and chip shop
Kinder egg small plastic toys in the nursery play area
3 filled dog poo bags hanging from trees
Many, many plastic straws that have escaped the restaurant rubbish bags
Mouldy banana skins in a school playground
Pop corn strewn on the ground outside the cinema
Subway cups outside the Hydro
Litres and litres of polluted water.....

Procedure :

1. Allow litter to gather and fall everywhere due to careless irresponsible humans.
2. The wind can stir with hatred and mix the litter aggressively.
3. Add raindrops, snow, sleet , sun and hail to the putrid concoction.
4. The litter will flow down the drains into the famous Clyde with the polluted water.
5. The floating debris heads from the estuary out to the North Atlantic Ocean.
6. 12.7 million tonnes of rubbish follows this cycle every year !
7. Innocent animals choke, get hurt and are tricked into thinking plastic rubbish is a tasty snack.
8. **IT DOESN'T HAVE TO BE THIS WAY !!!!!**

We can be responsible citizens for our world !

Remember

Reduce

Reuse

Recycle

**Spread the word.....marine litter is REAL,
the animals deserve better !!!!!!!**
