

Design a 'litter monster' that will help to clear your local environment of all sorts of rubbish.

Things to think about:

- Your local area. Do you live near the coast, in the countryside or the town centre? How would your litter monster manage to move around this area?
- What types of litter are commonly seen in your area?
- What would your litter monster be built from, how would they be environmentally friendly?
- What kind of tools would your litter monster have for collecting and disposing of litter?
- What would your litter monster be called?
- What type of animal would your litter monster be a guardian of? Maybe there is an animal that you see often, lives in your area and you want it to be protected from litter.

Be as imaginative and creative as you can!

ANIMAL WISE[®]
SCOTTISH SPCA

Do you live near the coast, in the countryside or the town centre?

How would your litter monster manage to move around this area?

What types of litter are commonly seen where you live?

What would your litter monster be built from, how would they be environmentally friendly?

What animal would your litter monster be a guardian of? Perhaps it's an animal that frequents where you live or needs protecting from the litter in your area.

If one human year equals four monster years, how old is my monster in human years and monster years? (like with dogs!),

Write a description of your monster below or a story about how it has managed to save it's animal friend from litter!
