

Learning about Forests (LEAF)

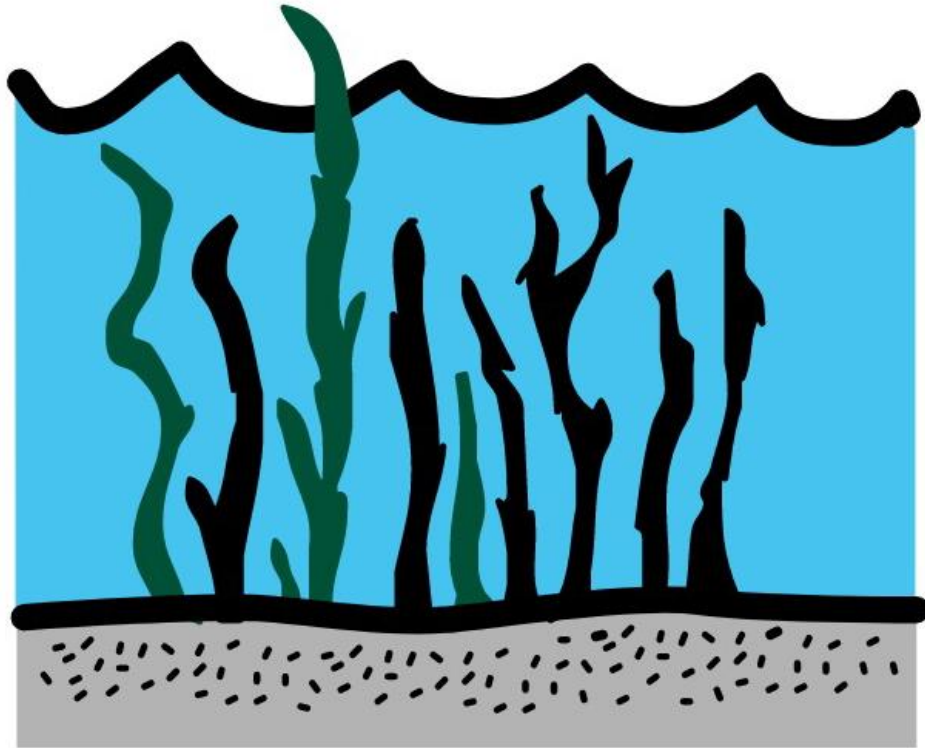

We live on a planet
called Earth

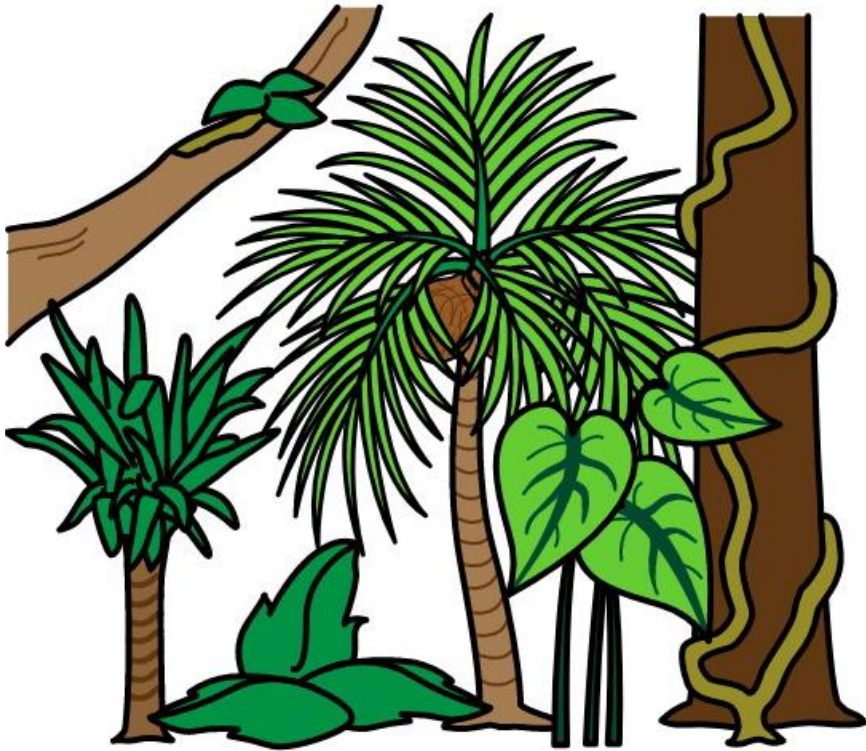

There are lots of
forests on Earth

There are forests
on the land

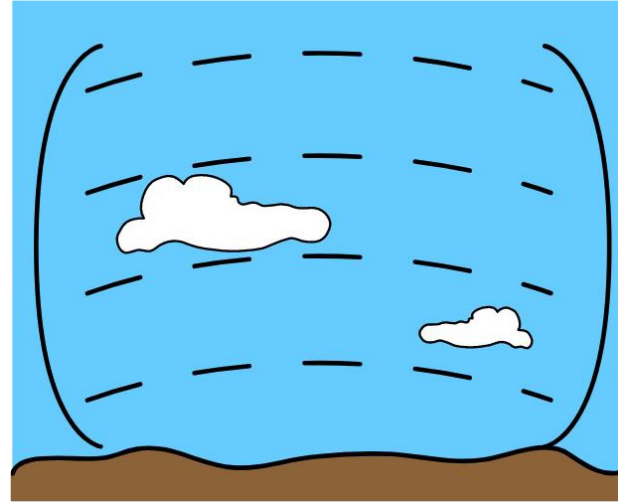

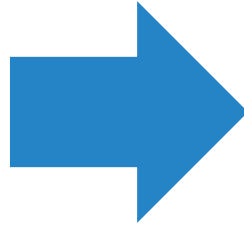

There are forests
underwater

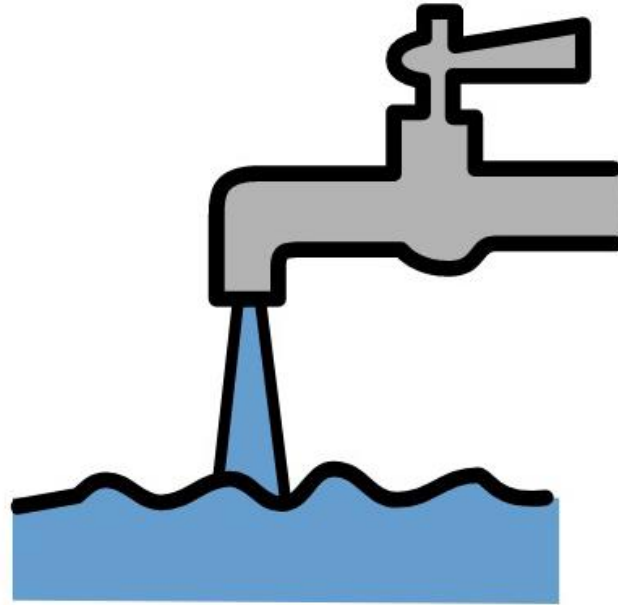

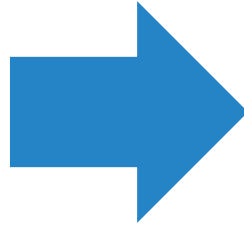

Forests are
important

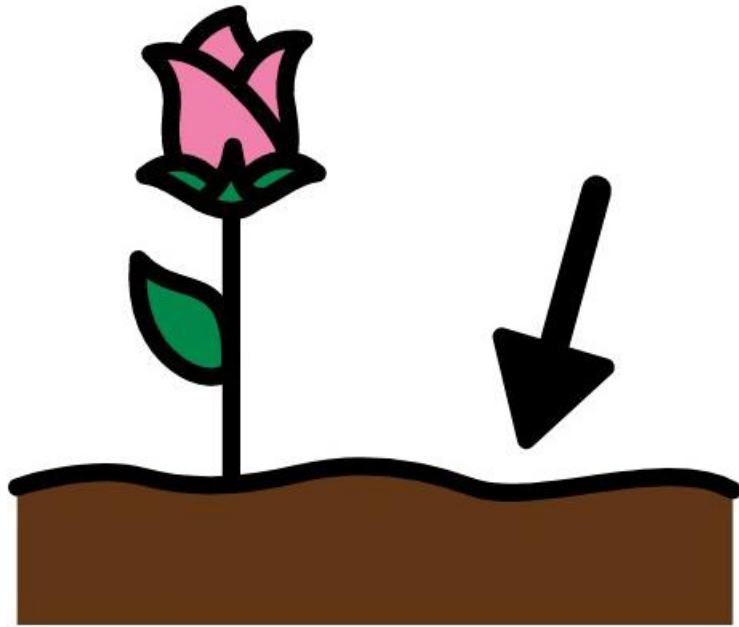

They are homes for
many animals and
plants

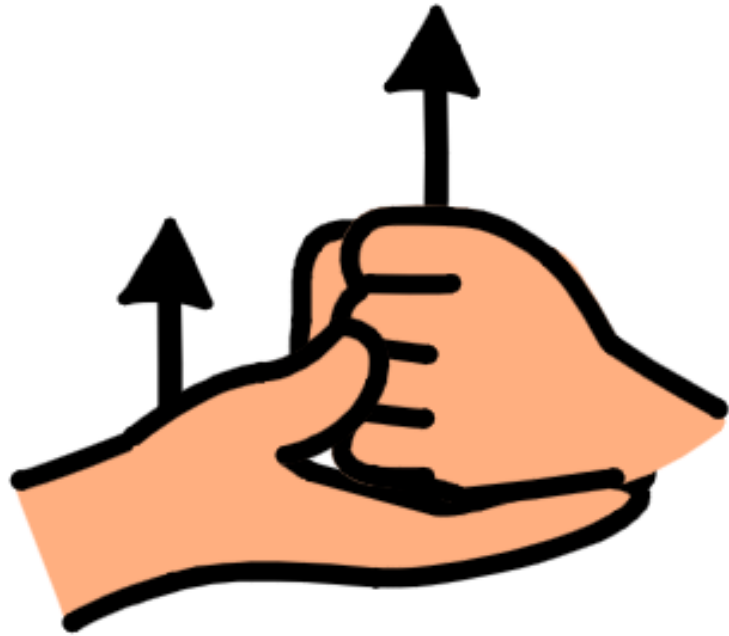

They help clean our air

They help clean our water

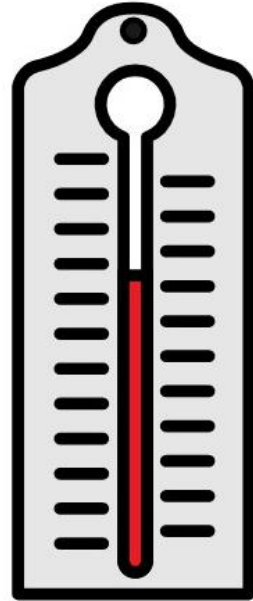

They help hold soil
in place

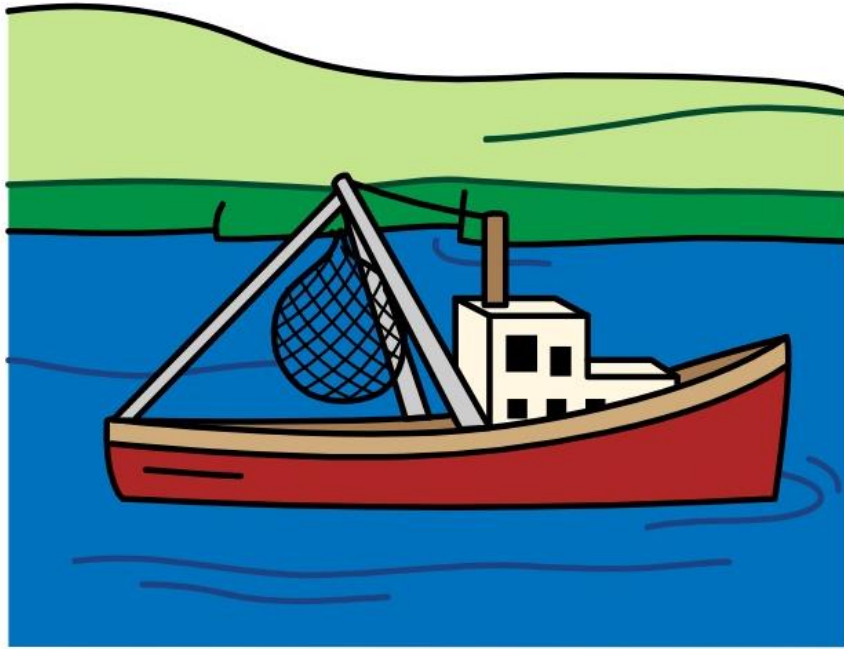

Forests need our
help

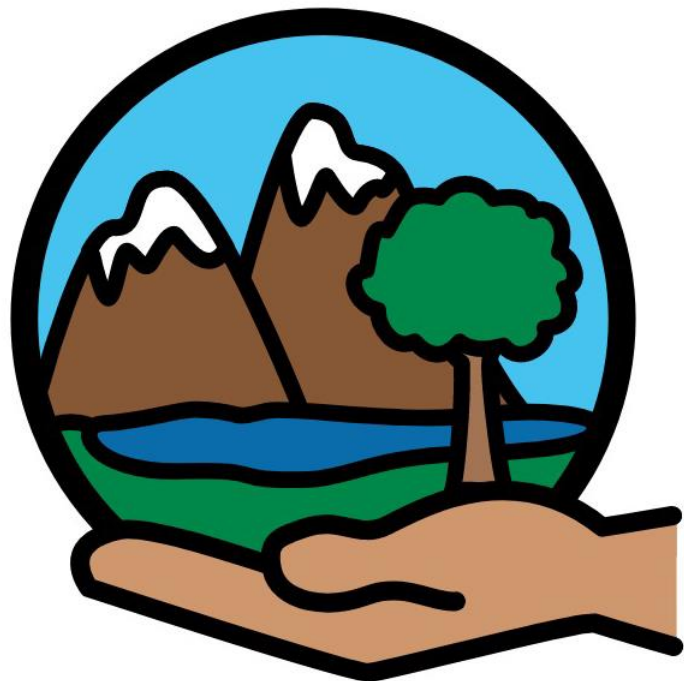

People are cutting
down too many
trees

Changes in our
weather are damaging
trees

Fishing can damage
underwater forests

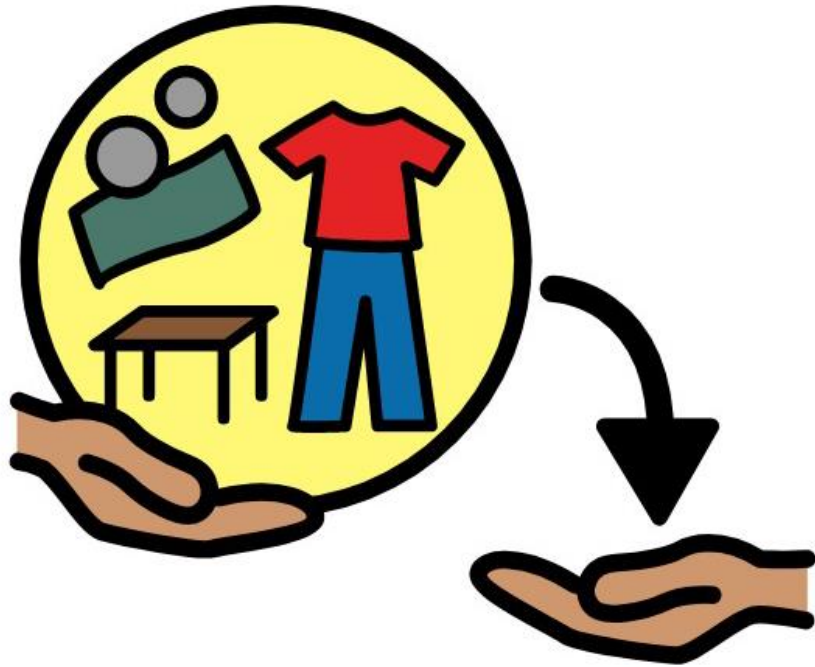

I can help forests

I can visit forests
and learn about
them

I can plant trees to
make new forests

I can support
charities that look
after forests

I can ask adults to
look after forests
